Dashed Lines in Tables

Herbert Voß

12. June 2001

With the package `arydshln` you can create dashed horizontal and vertical lines. If you want to have all lines dashed for all tables in the whole document, write in latex preamble:

`\usepackage{arydshln}`

On the other hand you can define single dashed lines for every table like the following one:

a	a column with a with of 5cm and left laligned	text
b	main muss	text
c	main ist eine	text right aligned
d	main hat keinen	texttext
e	Array der Klasse	text

```
1  \begin{tabular}{|c:p{5cm}:r|ll}\hline
2  a & a column with a with of 5cm and left laligned & text\\\
       hdashline
3  \texttt{\small }b & \texttt{\small main} muss & text\\\cdashline
       {2-3}
4  \texttt{\small c}  & \texttt{\small main} ist eine & text right
       aligned\\\cdashline{1-2}
5  \texttt{\small }d & main hat keinen & texttext\\\cdashline{3-3}
6  \texttt{\small e} & Array der Klasse & text\\\hline
7  \end{tabular}
```
